

CAMBRIDGE
ELEVATING

DESIGNED FOR FINER LIVING.

PREMIUM RESIDENTIAL ELEVATORS

DESIGNED FOR FINER FUNCTIONALITY.

Cambridge Elevating rises above our competition in providing reliable home lift systems that serve as both an integral and elegant fixture in the home. Every design is constructed for superior longevity featuring the same rail system, car frame, and power unit as low-rise commercial models. Enhanced durability is obtained through integration of a steel tube skeleton with overbuilt sub-floor to prevent cab flexing. Every unit must pass extensive testing to ensure that smooth and whisper quiet operation is always guaranteed.

FORM MEETS FUNCTION WITH IMPECCABLE DESIGN AND SEAMLESS OPERATION
